

# FOAL DISCOVERY™

- **Foal Discovery™** is an advanced colostrum supplement that offers rapid response nutrition for newborn foals.
- **Foal Discovery™** prepares the foal's gut to receive and utilize the immune and growth factors in colostrum, stimulates suckling instinct, and initiates the desire and energy to nurse.

• **Recommend For:**

- Healthy and/or ill new born foals, older foals, and weanlings
- Rejected or orphaned foals
- Foals born to mares with abnormal gestation
- Foals born to older mares
- Pre-mature or delayed births
- As a preventative in the defense against unknown/known contaminated foaling stalls
- Foals born to mares with abnormal colostrum leakage before foaling
- When foaling is induced
- Weaning

- **Colostrum** provides the highest integrity colostrum with the most bioactive properties for immune support. It supplies selenium and vitamins A and D, which newborns are deficient in as well as providing antibodies to support the immune system and growth factors that encourage the development of healthy intestinal tissue. KPx Technology bovine colostrum is produced in the United States and manufactured in FDA and USDA approved facilities. It is harvested within the 1st 12 hours post parturition for peak bioactivity.

- **Vitamins A, C, D** and the mineral **Selenium** provide antioxidant support. They promote healthy immune, respiratory and gastrointestinal systems. They help supply what may have been lacking in the mare which reduces the foal's susceptibility to respiratory and intestinal distress.

- **Vitamin B12** is important for the production of red blood cells and proper digestion which makes it important for foals with developing digestive tracts. A deficiency in B12 is common in horses with digestive upset.

- **Mannan Oligosaccharides (MOS)** have been shown to displace a variety of potentially harmful microorganisms from the digestive tract. Feeding MOS to new born foals promotes the rapid growth of good bacteria in the digestive tract immediately benefiting GI tract health.

- **Medium Chain Triglycerides** are easy to digest fats that provide an excellent "quick" source of energy for new born foals.

- **Beta 1, 3, Glucans** provide natural immune enhancement and protection against undesirable microorganisms.

- **Nucleotides** support gut repair and immune function.

- **Foal Discovery™** contains vital gut and immune system support ingredients, which makes it ideal for newborns, older foals, or weanlings.

- Available in its own disposable tube to ensure proper amount for each foal. No waste! No guesswork!

• **Feeding Directions:**

Administer, at room temperature, the entire content of tube to the foal as needed.

• **Foal Discovery™ Paste**

0500485.030 (30 ml Calibrated Tube)

**FOAL DISCOVERY™**

**Guaranteed Analysis Per 30 cc:**

**The following values are minimums unless otherwise stated.**

Crude protein (minimum)	14%
Crude fat (minimum)	12%
Crude fiber (maximum)	0.45%
Selenium (6.7ppm)	0.2 mg
Vitamin A	42,000 IU
Vitamin D3	8,400 IU
Vitamin E	400 IU
Vitamin B12	0.075 mg
Ascorbic Acid (Vitamin C)	50 mg
Mannan Oligosaccharides (MOS)	3,000 mg
Medium chain Triglycerides	3,000 mg

**Ingredients:** dried whole milk, vegetable oils, primary yeast dehydrated, dried apple pectin pulp, carrageenan, glucose, maltodextrins, glycerin, guar gum, lecithin, silicon dioxide, alpha-tocopherol acetate, vitamin A acetate, vitamin D3 supplement, vitamin B12 supplement, sodium selenite, ascorbic acid.
