

IMMEDIACARE G.I.™ EQ

- A fast acting easy to administer paste that provides immediate G.I. support for horses.

- **ImmediaCare G.I.™ EQ** contains a specialized yeast extract rich in mannan oligosaccharides (MOS) derived from the cell wall of yeast (from *Saccharomyces cerevisiae* and Brewers dried yeast), probiotics (including: *Bacillus subtilis*, Mixed Lactic acid bacteria, *Enterococcus faecium*), fungal derived enzymes from *Aspergillus oryzae*, and B Vitamins, which work together as a fast acting formula to normalize the G.I. tract.

- **Recommended for:**

- G.I. health issues
- Nervous gut and food sensitivities
- Old age (less digestive enzymes)
- Stress (acute or chronic)
- Maintaining G.I. tract integrity
- Supporting naturally occurring beneficial bacteria as well as growth of the probiotics in the formula
- Horses that need to travel or board

- Most horses respond within 24 hours, which makes it an “immediate care” product for G.I. tract problems, while awaiting lab results!

- **ImmediaCare G.I.™ EQ** contains a specialized yeast extract that is rich in mannan oligosaccharides (MOS). MOS does not provide any nutrition to the unwanted bacteria, so they are unable to grow and colonize in the G.I. tract. MOS is not broken down by digestive enzymes, so it is able to pass through the G.I. tract with the unwanted bacteria and toxins attached, allowing the body to expel them. MOS supplementation has also shown immune system regulating properties for gut health. MOS provides more binding sites than FOS (Fructo Oligosaccharides).

- **ImmediaCare G.I.™ EQ contains probiotics including beneficial microbes like:**

Bacillus subtilis, Mixed Lactic acid bacteria, *Enterococcus faecium* that helps maintain microbial balance in the gut. They also support the growth of helpful bacteria, help maintain proper water level in the gut, and limit the proliferation of unwanted bacteria in the G.I. tract.

- Vitamins work synergistically with the probiotics to support their growth as well as the growth of the naturally occurring beneficial microbial population in the animal’s gut. This causes a quicker response and helps to reduce stress on the G.I. mucosa. Riboflavin (B2) supports gut health; Pyridoxine hydrochloride (Vitamin B6) for proper immune function.

- Notched Dial-A-Serving Tube for easy dispensing!

- **Directions For Use:**

Immediate Use: Give entire contents of tube (1/2 tube for foals and ponies) 1 to 3 times daily when G.I. disturbance is present for up to 2 days or until results achieved.

Maintenance:

Horses under 1,200 lbs give 10cc per day.
Horses 1,200 lbs and over give 12 cc per day.

- **ImmediaCare G.I.™ EQ**

0500470.080 (80 cc Calibrated Tube)

IMMEDIACARE G.I.™ EQ	
Active Ingredients Per 10 cc Serving:	
Pantothenic Acid	10.5 mg
Pyridoxine HCl (Vitamin B6)	2.5 mg
Riboflavin (Vitamin B2)	1.0 mg
Mixed Lactic Acid Bacteria	1.3 x 10 ¹⁷ CFU
<i>Saccharomyces cerevisiae</i>	3.4 x 10 ¹⁶ CFU
<i>Bacillus Subtilis</i>	3.8 x 10 ¹⁵ CFU
<i>Aspergillus oryzae</i>	1.3 x 10 ¹⁵ CFU
Inactive Ingredients: carrageenan, d-calcium pantothenate, dried apple pectin pulp, dried <i>Aspergillus niger</i> fermentation extract, dried <i>Aspergillus oryzae</i> fermentation extract, dried <i>Bacillus subtilis</i> fermentation extract, dried <i>Enterococcus faecium</i> fermentation product, dried <i>Lactobacillus acidophilus</i> fermentation product, dried <i>Lactobacillus casei</i> fermentation product, dried <i>Lactobacillus plantarum</i> fermentation product, mucilage, polysorbate-80, primary yeast dehydrated, silicon dioxide, vegetable oil, yeast extract, yeast fermentation solubles.
