

JOINT DISCOVERY™ & JOINT DISCOVERY™ DOUBLE STRENGTH

- **Joint Discovery™** products are for the support of hip, joint, and connective tissue functions in small and large dogs at any stage of life.

- **Joint Discovery™** products are easy to administer, chicken-flavored, chewable tablets that are recommended for maintaining healthy joints and connective tissues in dogs and for those dogs with special joint needs. Dogs love the taste and you'll love the ease!
- Age, breed, diet, lifestyle, injury, and stress can affect the health of any joint's structure and function. **Joint Discovery™** supports the proper structure and function of synovial joints and supports range of motion in dogs.
- **Joint Discovery™** is a synergistic combination of natural ingredients to optimize your dog's joint function, while at the same time providing the raw materials and building blocks necessary to support joint tissue.
- **Joint Discovery™ Double Strength** contains twice the amount of Chondroitin Sulfates, Glucosamine HCl, Methylsulfonylmethane, and Ascorbic Acid as the regular **Joint Discovery™** and was formulated specifically to meet the needs of larger dogs.
- **Chondroitin** supports the proper structure and function of healthy connective tissues and joints. The purified chondroitin sulfates in the **Joint Discovery™** products are derived from Certified BSE Free bovine tracheal cartilage, which is a rich source of biologically active Chondroitin Sulfates.
- **Glucosamine** has been shown to support Glycosaminoglycan (GAG) synthesis in cartilage matrix and synovial fluid as well as proteoglycan and collagen synthesis. GAGs are principle components of cartilage and the synovial fluid found in the joint. As dogs age, there is a decrease in the production of GAGs, which can result in joint stress, thinning of synovial fluid, and breakdown of connective tissue.
- **Methylsulfonylmethane (MSM)** supports metabolism as a source of organic sulfur. MSM supports the building of joints and connective tissue and provides raw materials to create new cells.
- **Ascorbic Acid** is required for the synthesis of collagen and for the production of GAGs. As an antioxidant it protects tissues from damage caused by free radicals.
- **Manganese** is essential for the formation of collagen, GAGs, and proteoglycans.
- **Directions For Use:**
For more severe cases, increase by 1 tablet for the first 3 weeks. If giving more than 1 tablet, divide between AM and PM.

Joint Discovery™:

Initial: (4 - 6 weeks)

Up to 15 lbs: 2 tablets daily.
16 - 30 lbs: 3 tablets daily.

Maintenance: (After initial period)

Up to 15 lbs: 1 tablet daily.
16 - 30 lbs: 2 tablets daily.

Joint Discovery™ Double Strength:

Initial (4 - 6 weeks)

30 - 60 lbs: 2 tablets daily.
61 - 100 lbs: 3 tablets daily.
101 lbs and over: 4 tablets daily.

Maintenance:

30 - 60 lbs: 1 tablet daily.
61 - 100 lbs: 2 tablets daily.
101 lbs and over: 3 tablets daily.

- **Joint Discovery™**
0500558.090 (90 Tablets)
- **Joint Discovery™ Double Strength**
0500559.090 (90 Tablets)
0500559.180 (180 Tablets)

JOINT DISCOVERY™

Active Ingredients Per Tablet:

Methylsulfonylmethane (MSM)	250 mg
Chondroitin Sulfate (Bovine)	200 mg
Glucosamine HCl (Shrimp and Crab)	125 mg
Calcium Ascorbate	
yielding Ascorbic Acid (Vitamin C)	25 mg
Manganese (as Mn Amino Acid Chelate)	1.2 mg

Inactive Ingredients: brewers yeast, natural chicken flavor, silicon dioxide, stearic acid.

JOINT DISCOVERY™ DOUBLE STRENGTH

Active Ingredients Per Tablet:

Methylsulfonylmethane (MSM)	500 mg
Chondroitin Sulfate (Bovine)	400 mg
Glucosamine HCl (Shrimp and Crab)	250 mg
Calcium Ascorbate	
yielding Ascorbic Acid (Vitamin C)	50 mg
Manganese (as Mn Amino Acid Chelate)	2.4 mg

Inactive Ingredients: brewers yeast, natural chicken flavor, silicon dioxide, stearic acid.
