

JOINT DISCOVERY™ FOR HUMANS

- **A dietary supplement to support skin, vascular, joint and connective tissue health.***

- A unique combination of protective ingredients that work synergistically to:
 - Support cartilage and collagen regeneration by providing raw materials for production of glycosaminoglycans (GAGs)*
 - Support moisture retention, collagen production, and skin elasticity*
 - Balance certain mediators like cytokines and prostaglandins that can cause stress in joints.*

BioCell Chicken Collagen II™

- Chicken Collagen II™ is made from 100% pure enzymatically hydrolyzed chicken sternum cartilage, thereby providing high bioavailability and purity.
- It is the only patented clinically-tested source of Chicken Collagen Type II; shown to be effective in joint and skin conditions due to its purity and high bioavailability.*
- It contains chondroprotective agents that support joint, skin and vascular structure, function, and lubrication.* Cartilage Matrix Glycoprotein protects cartilage from breakdown, balances cytokines and prostaglandins, and supports cartilage synthesis.*

Hyaluronic Acid

- The BioCell Chicken Collagen II™ naturally contains a minimum of 10% of Hyaluronic Acid (HA), a GAG not usually found in other Collagen products.
- HA supports retention of skin moisture and functions as a lubricant between the connective tissue of the skin and is a major constituent of synovial fluid in the joints.*
- HA rejuvenates skin and improves skin tone.*

Chondroitin Sulfates

- BioCell Collagen II™ naturally contains a depolymerized Chondroitin Sulfates which are absorbed up to 5 times better than bovine-derived materials.*
- Chondroitin Sulfates support the flexibility and elasticity of many body tissues including connective tissues, the walls of blood vessels, and the structural integrity of the heart, brain, and skin.*

Glucosamine HCl

- Glucosamine supports skin and joint health by supporting the production of GAGs, proteoglycans, and collagen.* GAGs give shape, elasticity and rigidity to connective tissues.* GAGs hold high levels of water in their structure which enables the joints, skin and vascular beds to hold more water thereby increasing flexibility, cushioning ability, and resiliency.*

Methylsulfonylmethane (MSM)

- MSM is an important source of organic sulfur. Sulfur is found in collagen, hormones, and immunoglobulins. Sulfur helps maintain proper connective tissue function and formation of collagen.
- Sulfur deficiencies have been associated with slow wound healing, immune system dysfunction, poor skin health, and degenerative joint conditions.*
- MSM supports proper tone, elasticity, and texture of the skin and is needed proper hair and nail growth.*

• **Supplement Facts Panel**

Amount Per Serving

Hydrolyzed Chicken Collagen Type II	1000 mg
Methylsulfonylmethane	800 mg
Glucosamine HCl (from shrimp and crab)	600 mg

Other Ingredients: microcrystalline cellulose, stearic acid, vegetable stearate, croscarmellose sodium, silicon dioxide.

- **Suggested Use:** Take 2 tablets, once daily. For faster results take 2 tablets twice daily for 4 weeks.

NOT FOR USE IN CATS AND DOGS.

- 0500410.090 (90 Tablets)
